Created Wetland: <https://ebird.org/barchart?r=L3088296&yr=all&m=>

**Habitats:** river floodplain, wetland, pond, wooded stream, grassland, deciduous forest, mixed forest, marsh

### **Access & Parking**

**Parking:** ample parking available on gravel surface

**Drinking water:** not available

**Restrooms:** portable restrooms available during warm weather months at Clawson-Burnley Park.

**Accessibility:** accessible parking is available at Clawson-Burnley Park. The main Greenway trail is paved.

### **Site Description**

**Property ownership:** Town of Boone park

**Trails:** main path is about 3 miles long following Winkler's Creek, which becomes the South Fork of the New River. There are several trails branching off of the

main trail, which can add another 3 miles or so of walking. Maps of the trails are posted on the main trail.

**Trail surface/elevation gain:** main trail is paved, at 3130 feet elevation, and is relatively flat. Other trails are unpaved with as much as 150 feet of elevation gain.

**Likely spots for species of interest:** the created wetland at the Clawson-Burnley Park attracts shorebirds, especially during migration. **Follow the main trail past the created wetland to a second set of recreational fields. A slough/wetland with marsh and shortgrass habitat is located at the far end of these fields and can be reached by crossing the fields or by walking on the parking lot above the fields to the left.**

### **Special Considerations**

**Hunting:** not allowed

**Need for boots/waterproof footwear:** only after heavy rains when wanting to venture off trail

**Other:** considerable foot traffic and some bicycling, popular dog-walking spot

### **Directions**
